CHANDLER GLASS & PACKAGING

Chandler Glass & Packaging (Chandler) was established in 2007 by Stephan & Emmanuelle Jelich, with David Granger becoming a partner in 2010. Chandler coordinates, quality controls and supplies wine bottles, decorated screwcaps and decorated cartons to wine producers throughout New Zealand. In addition, we supply bottles and cartons to wine producers in the United States and Australia.

Chandler's principal aim is to provide winemakers and wine marketers with a wider range of choice and greater dependable quality. As an enterprise, we pride ourselves on being resourceful and nimble. We keep pace with the ever changing landscape of wine branding by regularly offering innovative packaging solutions that challenge the entrenched rulebook on bottling wine.

Along with this, we aim to provide our clients with exemplary service and competitive pricing, without compromising bottle performance or visual quality.

Currently, Chandler annually coordinates the production and supply of 100+ million wine bottles for wine producers within three markets and is the second-largest supplier of bottles and 30 x 60 screwcaps to New Zealand producers.

Over the first few years of operation, we developed our own range of moulds for BVS, sparkling and cork mouth bottles of varying weights and forms. Our focus has not only been on the aesthetic and cosmetic aspects of the bottles, but also on the exacting controls required to achieve a high performing BVS mouth finish along with flat label panels. In doing so, we believe that we have encouraged improvements to the general standard of wine bottles within New Zealand, as well as helping to elevate the quality and performance expectations of bottlers for essential dry goods.

WHAT CHANDLER DOES

Our team of on-line quality control personnel operate 24 hours, 7 days a week, monitoring output on every production line at our manufacturers' facilities. On the production line, we measure and inspect our production output against well-established quality control parameters before the bottles are packed, eliminating the risk of non-conforming bottles being shipped to you.

Meanwhile, our experienced NZ based team work closely with your planning personnel to make sure your company receives its required products in full, as and when required.

CHANDLER — ADDITIONAL BOTTLE PRODUCTS & SERVICES

Whilst we focus on delivering a competitively priced standard range of mid to heavy weight premium BVS bottles, our other capabilities lie in the production and delivery of:-

- Permanent decorations applied at source — screen printed and decal
- Embossing & Debossing logos
- Premium and Super Premium (heavy) cork mouth bottles
- Bottles no longer readily available — including many cork mouth models phased out by other bottle producers
- Bespoke bottle shapes and unique design opportunity

New bottle designs, customised emboss/deboss logos or decorated bottles — are delivered via a disciplined and deliberate design and sign-off approval process, which includes:-

- Final technical drawings and packaging specifications
- Quality control parameters and tolerances (dual-language)
- Pre-production sampling — for final approval (for all new bottles or decoration designs)

For all your wine packaging requirements, please do not hesitate to contact the team at Chandler.
