

2019 BOTTLE RANGE

AUSTRALIA

WHO IS CHANDLER?

Chandler Glass & Packaging (CGP) was established in 2007 to coordinate, quality control and supply wine bottles to wine producers in the United States and New Zealand.

Currently, CGP coordinates the production and supply of 100+ million wine bottles per annum for wineries in New Zealand, Australia and the United States and is the largest supplier of imported wine bottles to New Zealand.

We have developed and own a proven & reliable range of BVS mouth bottles, Sparkling and cork mouth bottles — of varying weights, form and design. We set out to lift the consistency of wine bottle quality within the markets that we operate — especially around the controls for the BVS mouth finish and label panels. In doing so, we feel we have helped to improve the general standard of bottles within these markets and therefore elevated the quality expectations of our clients.

Chandler Glass and Packaging Pty Ltd (Chandler) was established in Australia to provide an alternative, reliable source of wine bottles, as well as a greater range of options. Our aim is to provide great service and competitive pricing to Australian winemakers, without compromising bottle performance or visual quality.

WHAT CHANDLER DOES

Our team of on-line quality control personnel operate 24 hours, 7 days a week, monitoring output on every production line at our manufacturer's facilities. We measure and inspect our production against well-established quality control points before the bottles are packed, eliminating the non-conformance risks commonly associated with imported glass.

Meanwhile, our experienced domestic-based team work closely with you to make sure you receive your required products in full, at competitive prices, as and when required.

PALLET CONFIGURATION

To suit the requirements of many Australian bottlers, the majority of Chandler's bottles are fully palletised on to Australian sized, low-rise pallets. However, for those clients who have flexible de-palletising systems, we can produce to supply bottles on international sized pallets (1.0 x 1.2m) and in doing so, pass on cost savings.

WHAT ELSE DOES CHANDLER GLASS & PACKAGING OFFER?

Whilst we focus on delivering a competitively priced standard range of mid to heavy weight Premium BVS bottles, our other capabilities lie in the production and delivery of:-

- Premium and Super Premium (heavy) cork mouth bottles
- Bottles no longer readily available — including many cork mouth models phased out by other bottle producers
- Permanent decorations applied at source — screen printed and decal
- Embossing & Debossing logos
- Bespoke bottle design

New bottle designs, customised emboss/deboss logos or decorated bottles — order requirements are delivered via a disciplined and deliberate design and sign-off approval process, which includes:-

- Final technical drawings and packaging specifications
- Quality control parameters and tolerances (dual language)
- Pre-production sampling (for all new bottles or decoration designs)

SEE CORK RANGE ON NEXT PAGE.

Std = batch produced – standard range

MTO = made to order. These bottles are not held as inventory at the factory. They are only made if combined client orders reach the MOQ of 300,000 bottles. When reached, the lead-time for this category of bottle is an additional 8 weeks.

Please enquire to find out more. adam@chandler.co

Pallet Configuration

To suit the requirements of many Australian bottlers, the majority of Chandler's bottles are fully palletised on to Australian sized, low-rise pallets — based on 3 + 4 layers using plastic inter-layers, unless otherwise stated.

* Based on 3 + 3 layers using cardboard layer boards.

However, for those clients who have flexible de-palletising systems, we can produce to supply bottles on international sized pallets (1.0 x 1.2m) and in doing so, pass on cost savings.
