CHANDLER GLASS & PACKAGING

Chandler Glass & Packaging (Chandler) was established in 2007 to provide an alternative, reliable source of wine bottles, as well as a greater range of options. We coordinate, quality control and supply wine bottles to wine producers in the New Zealand, United States and Australia. Along with this, our aim is to provide great service and competitive pricing to New Zealand winemakers, without compromising bottle performance or visual quality.

Currently, Chandler annually coordinates the production and supply of 100+ million wine bottles for wineries within these markets and is the largest alternative supplier of wine bottles to New Zealand.

We have developed and own a proven & reliable range of BVS mouth bottles, sparkling and cork mouth bottle moulds— of varying weights and shapes. We set out to lift the consistency of wine bottle quality within the markets that we operate — especially around the controls for the BVS mouth finish and label panels. In doing so, we have encouraged improvement to the general standard of wine bottles within these markets and elevated the quality expectations of our clients.

WHAT CHANDLER DOES

Our team of on-line quality control personnel operate 24 hours, 7 days a week, monitoring output on every production line at our manufacturer's facilities. We measure and inspect our production against well-established quality control points before the bottles are packed, eliminating the non-conformance risks commonly associated with imported glass.

Meanwhile, our experienced domestic-based team work closely with you to make sure your company receives its required products in full, at competitive prices, as and when required.

PALLET CONFIGURATION

Bottles are packed on international sized one-way plywood pallets (1.0 x 1.2m) with a light plywood top frame. Bottles are usually supplied as a 7 layer configuration. However bottles that are greater that 318mm in height are stowed as 6 layers.

WHAT ELSE DOES CHANDLER GLASS & PACKAGING OFFER?

Whilst we focus on delivering a competitively priced standard range of mid to heavy weight Premium BVS bottles, our other capabilities lie in the production and delivery of:–

- · Premium and Super Premium (heavy) cork mouth bottles
- · Bottles no longer readily available — including many cork mouth models phased out by other bottle producers
- · Permanent decorations applied at source — screen printed and decal
- · Embossing & Debossing logos
- · Bespoke bottle shapes and design

New bottle designs, customised emboss/deboss logos or decorated bottles — order requirements are delivered via a disciplined and deliberate design and sign-off approval process, which includes:–

- · Final technical drawings and packaging specifications
- · Quality control parameters and tolerances (dual language)
- · Pre-production sampling (for all new bottles or decoration designs)

Further confidential information and a detailed presentation are available upon request.
